

Arpeco — the leader in innovative design and quality manufacturing of web processing equipment - presents the

DYNATRAK™ COUNTER

our most comprehensive label & length counter and machine controller.

Designed for the label industry, the Dynatrak's advanced multiprocessor system gives you:

- Easy to use simultaneous dual count
- High resolution length count of 1/32" (1 mm)
- Guided set-up with on-screen help
- Automatic count sensor set-up
- Secure count with operator notification
- Programmable job storage for 100 jobs
- Full range of available options
- Field upgradeable

Using the bright LCD display and touch sensitive screen, your operator has full access to the Dynatrak's broad range of standard and installed optional features. Easily understood icons and plain English text guides your operator through set-up functions.

Once a job has been set-up, the job parameters can be saved for the next time. Job names up to eight characters make later selection easier.

Standard Features:

- Dual count accumulators
- Dual mode counting
- Automatic count sensor set-up
- Guided set-up with on-screen help
- Batch size set-up and end of batch presets
- Length resolution to 1/32" (1 mm)
- Secure counting (Window Error Detection)
- Counter values saved on power fail
- Storage of up to 100 jobs
- Machine monitor
- Extensive diagnostic lights
- End of roll slowdown size

Optional Features:

- MMLD for up to 24 channels with automatic sensor set-up
- Flag / Splice (FSD) Detector
- Automatic fault placement of all faults for MMLD and FSD
- Barcode support for up to 4 independent heads
- Clear on Clear count and MMLD sensors
- Core Label imprinting
- Log Reports
- Video Inspection
